

ECO AVANGARD SRL IMPROVES CONSTRUCTION AND PLANT MANAGEMENT WITH ROSEMOUNT MAGNETIC FLOWMETERS

An Eco Avangard SRL Water Treatment Plant

RESULTS

Local support and training at Cluj facility

Higher quality products for utility applications

Reduced installation complexity with grounding diagnostics

Application

Eco Avangard SRL is a Romanian fast-growing company protagonist of Water and Waste Water industry in East Europe. For new water distribution and water treatment facilities, the company was looking for a reliable partner with proven technology to measure raw and purified streams.

Challenge

Local support was the key issue. Eco Avangard SRL was looking for a skilled partner, with local expertise and true capabilities to understand its business and optimize magnetic flowmeter technology offer, as well as capable to propose services to help its technicians best performing. In addition, grounding diagnostics has a great value to remove complexity in water installations.

Solution

Emerson™ and Eco Avangard SRL have started working together some months ago. Thanks to the local support of the European Flow Technology Centre of Cluj, Eco Avangard SRL technicians have benefited from the local expertise. The local expertise has allowed training for installation and configuration. Eco Avangard SRL has improved their construction and plant management performances with the Rosemount Magnetic flowmeters. A commercial agreement was signed for 175 units per year of Rosemount 8750W magnetic flowmeters. These flowmeters have met Eco Avangard needs for purified, raw and potabilized water.
